Brochure Disclaimer

Whilst every effort has been made to replicate the true colour of our products shown in this catalogue, wood is a 100% natural product which has colour variation in every individual piece. Photography shown and printing limitations therefore cannot be matched 100%, as such please allow for this before making your final selection.

Introduction

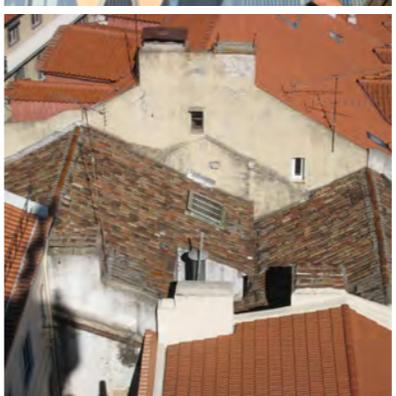

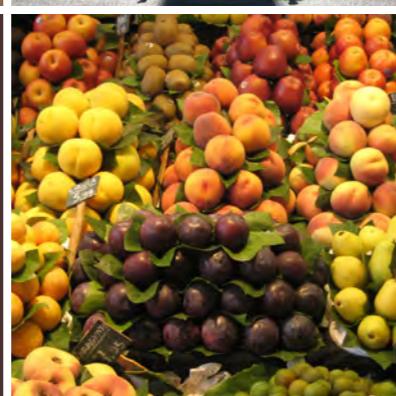

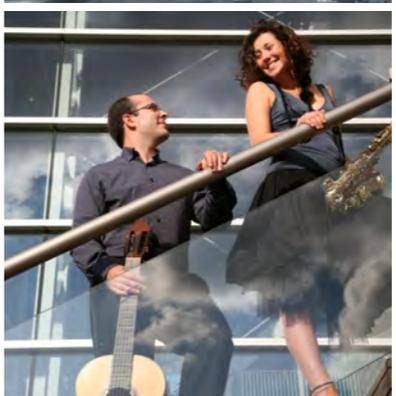

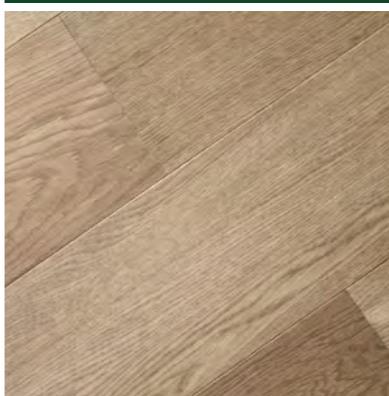

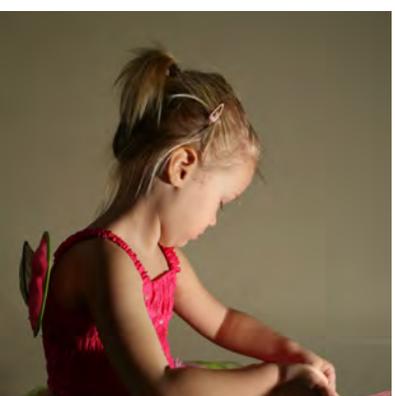

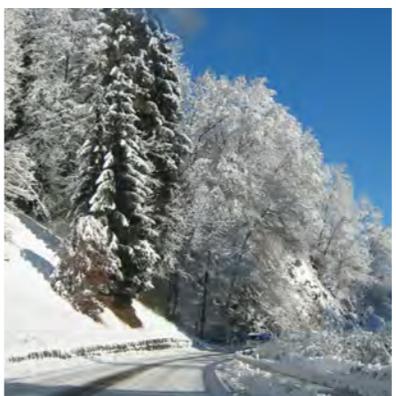

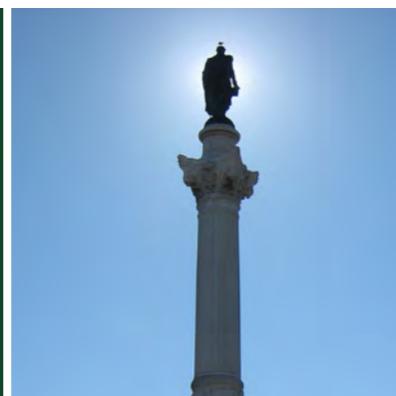

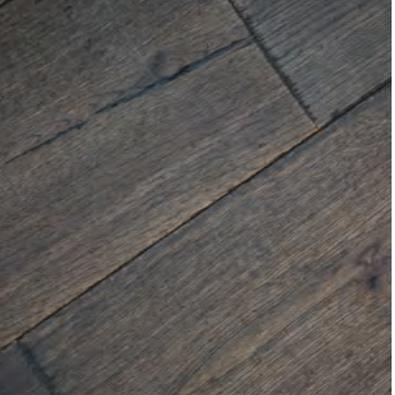

Step inside and experience our brand new Timba Floor collection where we have developed a product range of truly beautiful oak floors with you and your family in mind. Our floors are both traditional and innovative in design, with modern colour decors offering a wide choice of quality finishes to pick from, however one thing is guaranteed with Timba Floor and that is our build quality and strength, so please relax, study our products and enjoy styling your home. To help you here is a brief introduction to our floors;

Timba Floor European solids will give you great strength from our 20mm thick boards in a wide variety of size options, with an impressive average board lengths of + 920mm each piece of flooring is bursting with true European character and as ever with Oak timeless in appearance. Be sure to view our décor board on page 8, check out the features and benefits and read the consumer feedback to be reassured about choosing this quality solid floor.

If your need is for a structural floor, or you simply have a difficult installation take a look at our Timba Floor 18mm Engineered boards as they really are the floors for all locations. Our customers love the stability and strength of the hardwood multiply core base that we combine with a very durable 4mm oak wear layer to give a simple but very effective engineered floor board. Then look at our very imaginative design décor board on page 12 where we have added a selection of the latest colour trends featuring in homes today.

For value, quality and ease of installation take a look at our 14mm Timba Floor LOC for those everyday projects and busy family rooms. With great décor features and wide long boards that just drop into place using the market leading Välinge LOC system you really can create an exciting new ambience in a very short period of time.

Timba Floor, a natural selection

20mm Solid European Oak

'Pure Beauty'

'Classical Features'

'Great Strength'

We are proud to present the very best Timba Solid European Oak, impressive 20mm thick planks with longer than average boards our collection includes many features that will compliment your home for years to come whether you live in a traditional or ultra modern environment we have the ideal design for you. At Timba we believe a floor is far more than simply an item to walk on but in fact creates the ideal canvas for which you furnish your room, as such a simple reflection of your individual style, personality, culture and life. Selecting your new floor is the ideal time to let the designer influences come out in you, be creative and choose a thing of pure natural beauty that will show how you value your precious living space – real wood, real oak.

'Sophisticated Style'

'Value & Quality'

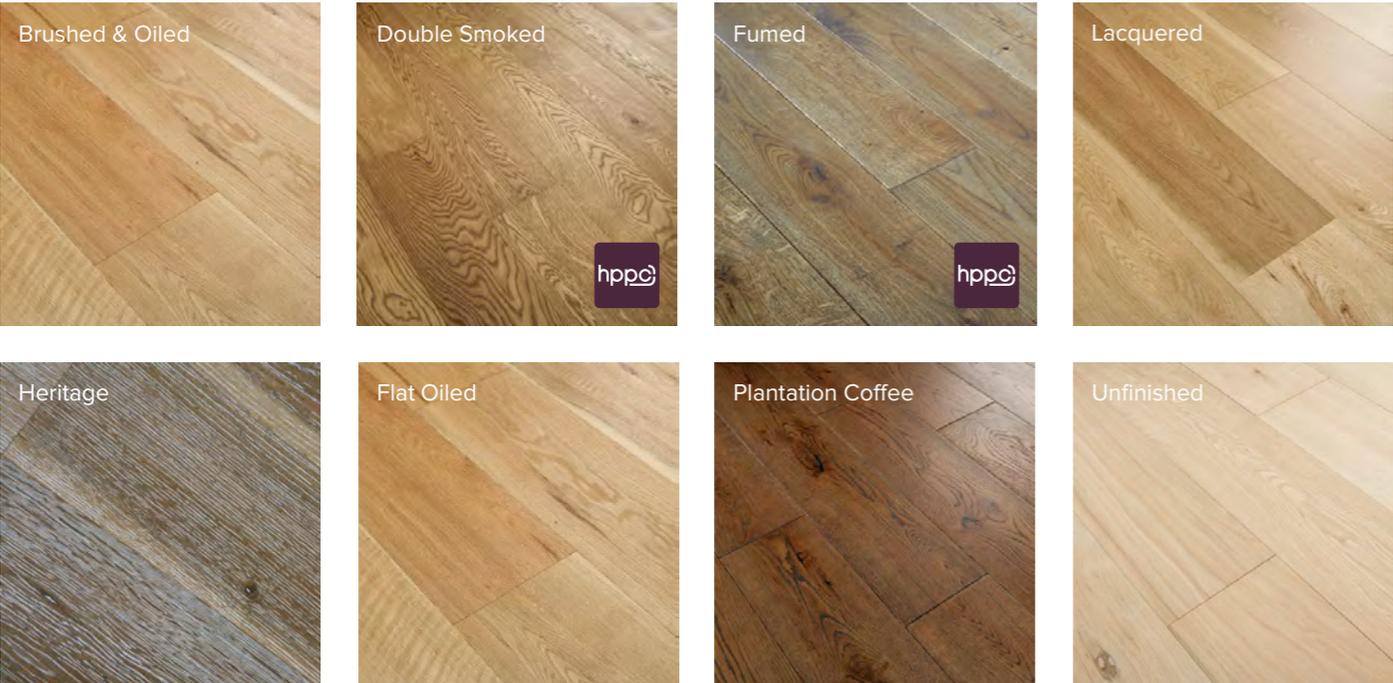

'Chic & Contemporary'

We have a feeling you will love the sleek and contemporary lines on our Timba 14mm Engineered Oak floors. Easy on the eye with micro bevelled edges that enhance the classic linear plank design, our boards come in a wide choice of stylish oak veneers with an exquisite selection of the best European finishes. A great benefit of Timba 14mm Engineered or Parquet flooring as it used to be called is that it offers simple, practical installation in a wide variety of rooms including use over under floor heating systems that may require access at a later date. The Välinge LOC allows easy removal and re-installation in such cases.

At Timba floor we always select the very best raw materials to use with our modern production facility providing you with flooring that can be both Chic & Contemporary or as Traditional as the room you put it in, however one thing for certain is by choosing Timba you guarantee value and quality every time.

Choose Timba Floor for pure beauty and strength, a truly 'Natural Selection'.

Olde English Oak - Limited Collection

If you are looking for that perfect floor for your period cottage, old town house or contemporary home our Olde English Oak will be the perfect match. Full of character each individual plank is unique in appearance, worn and in places distressed on the face, edges or ends of planks. All essential features when an aged Olde English traditionally styled piece of period flooring is required. Planks can be 6" or 7 1/4" wide*, depends on availability at the time – be sure to check with your stockist.

* 6" wide boards are 150mm / 7 1/4" wide boards are 180mm.

The Timba Environment

At Timba Floor we take our responsibility for the environment very seriously. In fact some famous people would say "The earth does not belong to us but has just been entrusted to us by our children."

As such at Timba Floor we are committed to ensuring all raw materials used on our products have been ethically purchased from well managed sustainable sources.
